Census Bureau Releases New Local-Level Demographic Information from 2010 Census for Arizona, Minnesota, Montana, New York, Oklahoma and Vermont

The U.S. Census Bureau today released new, detailed demographic information from the 2010 Census for Arizona, Minnesota, Montana, New York, Oklahoma and Vermont.

These Summary File 1 tables provide the most detailed counts available so far for these states. The data covers a wide range of topics, including households, families, relationship to householder, housing units, detailed racial and ethnic statistics are available for a variety of geographic areas, with most tables available for the entire state and for major counties.

What's Unique in Summary File 1

Summary File 1 provides new layers of detail about the topics covered in the 2010 Census and cross-tabulates many of these topics to provide a more nuanced picture. Beyond just providing counts of families, for example, the summary file also shows the number of families by type, by the age of the children present and by race and Hispanic origin of the householder.

Many of the tables are repeated for nine race and Hispanic or Latino origin groups: white alone, black or African-American alone, American Indian and Alaska Native alone, Asian alone, Native Hawaiian and Other Pacific Islander alone, some other race, two or more races, Hispanic or Latino, and white alone not Hispanic or Latino.

This is the collection of detailed tables called Summary File 1 from the 2010 decennial census. It contains seven data sets per state, with another seven for the national file. The seven data sets include 3 for very small geographic areas (one for blocks and two for block groups), a pair of inventory/hierarchical sets containing all P, PCT (with exceptions), H and HCT tables for all levels above BG. PCT tables with alpha suffixes are stored in a separate data set as are PCO tables. Use the Datasets.html file to enhance access to this collection. These data sets are being created as the data are released by the Census Bureau. We expect to have a complete collection (for all states and the national file) by some time in August, 2011.
